Porter Cable 690LR Base Panel Replacement

This guide will show you the steps to replace the base panel on the Porter Cable 690LR Router.

Written By: Emma Stine

INTRODUCTION

This guide will show you the steps to replace the base panel on the Porter Cable 690LR Router. It's quite difficult to mess this one up. Just make sure when you replace the base panel you screw it back in right side up.

TOOLS:

- 2 Hands (1)
- 9/32" flat-head Screwdriver (1)

Step 1 — Base

- Undo the black latch located on the base of the router by pulling upwards from underneath it.

Step 2

- Twist the base off the router.

ⓘ You may need to jiggle the base of the router slightly.

Step 3 — Base Panel

- Orient the base so the black circular plate is facing you. Locate the three silver screw heads.
- Use a flathead screwdriver to take off the three 10 mm screws.

To reassemble your device, follow these instructions in reverse order.
